## PUBLICATIONS

- **LED<sup>2</sup>-Net: Monocular 360° Layout Estimation via Differentiable Depth Rendering** [[paper](#)][[github](#)][[project](#)]  
*Yu-Hsuan Yeh\*, Fu-En Wang\*, Min Sun, Wei-Chen Chiu, Yi-Hsuan Tsai*  
[CVPR 2021 Oral]
  - We propose a differentiable layout-to-depth procedure to convert the 360° layout representation into the 360° horizon-depth map, thus enabling the training objective for our layout estimation network to take advantage of 3D geometric information.
- **BiFuse: Monocular 360° Depth Estimation via Bi-projection Fusion** [[paper](#)][[github](#)][[project](#)]  
*Yu-Hsuan Yeh\*, Fu-En Wang\*, Min Sun, Wei-Chen Chiu, Yi-Hsuan Tsai*  
[CVPR 2020]
  - We propose a two-branch neural network leveraging two common projections – equirectangular and cubemap projections – as inputs to predict the depth map of a monocular 360° image.

## DATASET PAPER

- **LayoutMP3D: Layout Annotation of Matterport3D** [[paper](#)][[github](#)]  
*Yu-Hsuan Yeh\*, Fu-En Wang\*, Min Sun, Wei-Chen Chiu, Yi-Hsuan Tsai*  
[Technical Report]
  - We release the first real-world dataset containing paired depth and layout annotations.
